

TAKE WHALE PHOTOS

HELP SCIENCE

www.happywhale.com

Do you enjoy wildlife photography? Scientists need your help. Join Happywhale in collecting sightings so we can track and learn more about these amazing creatures. It's simple. Take photos of: humpback, blue, fin, sei, southern right, killer whales, any rare whales, leopard and Weddell seals, as well as Antarctic shags at Base Brown. Upload your photos at happywhale.com We'll tell you what we find and share the data with scientists. **Participating is as easy as 1-2-3:**

southern right whale

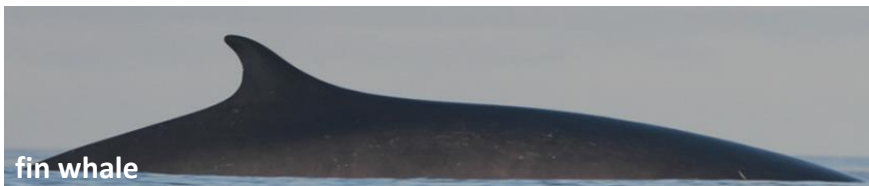

Weddell seal

leopard seal

Antarctic shag

fin whale

sei whale

blue whale

humpback whale

orca

1 Set

Set your camera to the local date and time. Turn on GPS if you've got it!

2 Photograph

Capture as many photos as you can clearly showing the ID features of the subject

3 Submit

Go to happywhale.com and upload all photos for each animal. For new users, an account will auto-generate.

Do not harass wildlife. Please be sure to follow all wildlife watching guidelines and laws and do not use photography - even for science - as justification to disturb animals. **Always respect the wildlife!**

How Will My Photos Be Used? Photos are used to identify individual animals and track the health and movements of populations worldwide. There is still so much to learn about Antarctic wildlife; your contributions are changing science, and we thank you for participating. **What stories will your photos tell?**
