Contribute to Antarctic science by sharing your photos of Humpback Whales with science through Happywhale.

(1) Set your camera time and date to local time so we know when and where photos were taken, (2) Photograph whales, and (3) Submit images at www.happywhale.com. We will identify your whales, tell you what we find, and share the data with scientists working to understand whale behavior and populations in Antarctica. We are interested in all large whales including humpbacks, blues, fins, southern right whales, killer whales and any rare whales (fluke photos for humpbacks, dorsal fin photos for all other whales). This catalog is a subset of the 7000 humpbacks that Allied Whale at College of the Atlantic has documented in the Southern Ocean.
